Professional Summary

Mid-level Frontend Developer with 1+ year of experience building scalable and high-performance web applications using React. Specialized in developing production dashboards, integrating RESTful APIs, and creating reusable component architectures that improve development efficiency and maintainability. Proven experience delivering real-world solutions for international clients, with a strong focus on performance optimization, clean code, and user-centered design. Passionate about building intuitive user interfaces and continuously improving technical skills to deliver high-quality frontend solutions.

Work Experience

Frontend Developer - ICN-Globe | November 2024 – Present

- Developed and maintained a production-grade operations dashboard for Estbn, a mobile car-maintenance platform, resulting in a 15% increase in user engagement.
- Built scalable and reusable UI components using React, Redux Toolkit, and Material UI, improving development efficiency by 20%.
- Integrated RESTful APIs with Laravel backend, ensuring reliable data flow and seamless user experience.
- Enhanced application performance and responsiveness across different devices and screen sizes, reducing load times by 25%.
- Collaborated within an Agile team, participating in sprint planning, code reviews, and version control using Git & GitHub.

Freelance Frontend Developer (Remote) - Saudi Arabia & Jordan | April 2025 – Present

- Delivered React-based web applications for international clients, focusing on performance, scalability, and responsive design, increasing client satisfaction by 30%.
- Translated business requirements into functional and user-friendly frontend solutions, resulting in a 20% increase in feature adoption.
- Developed dynamic features and integrated RESTful APIs to support real-time data and interactions.
- Built reusable and maintainable component structures to support long-term scalability and reduce future development time by 15%.
- Collaborated directly with clients to gather requirements, provide updates, and deliver on time.

Frontend Developer Intern - ICN-Globe | August 2024 – October 2024

- Worked on UI modules for Estbn using React, Redux, Bootstrap, and Material UI.
- Integrated frontend components with Laravel backend, contributing to a 10% reduction in data fetching errors.
- Participated in Agile team sprints, contributing to frontend tasks and providing feedback.
- Collaborated with senior developers to enhance project quality and efficiency.
- Gained hands-on experience in frontend development and Agile methodologies.

Education

Master's Degree in Public Law – Menoufia University, Shebin El-Kom | August 2018 – August 2020
Bachelor of Laws (LLB), English Department – Menoufia University, Shebin El-Kom | August 2014 – August 2018
Graduated with very good grade.

Projects

E-commerce Application (React)

- Built a multi-page shopping interface with product listing, cart system, and secure purchase flow using APIs.

Food Management App (React)

- Created a responsive app for managing food categories and recipes with full CRUD operations, authentication, and API integration.

Portfolio Website (React)

- A personal portfolio SPA using React Router, showcasing projects, skills, and contact forms.

Weather Dashboard (JavaScript)

- Developed a real-time weather application using external APIs, with 3-day forecast functionality.

Recipe Browser – Yummy (JavaScript)

- Built a dynamic recipe browsing app with search and category filtering using external APIs.

Training Courses

- **Training & Courses**
- **Upskilling (Job Simulation Bootcamp) – Frontend (React | 04/2024 – 07/2024**
- **Front-End Developer Training – Route Academy | 10/2023 – 02/2024**

Skills

Technical Skills:
React, HTML5, JavaScript (ES6+), TypeScript, Redux Toolkit, React Context API, React Query, CSS3, Tailwind CSS, Bootstrap, Material UI, Software Development, Agile Methodologies, Responsive Design, Component Architecture

Soft Skills:
Teamwork | Communication | Problem Solving | Time Management | Adaptability | Fast Typing | Monitoring Presentations | Troubleshooting | Resource Management | Academic Writing

Tools & Technologies:
Git, GitHub, Figma, REST APIs, Axios, Vite, npm

Additional Tools & Technologies:
Microsoft Outlook | Salesforce | Adobe Acrobat Pro | PowerPoint | Email Marketing | Social Media | Canva | Windows | Mobile

Languages

Arabic: Native | **English**: Fluent
